A joint initiative of Faculty from
Bond University, Griffith University
and the Gold Coast Integrated
Mental Health Service and
Queensland Health.

There will be optional workshops to
choose from on Sunday

www.gcimh.com.au

New Perspectives in Mental Health: P4

Policy initiatives: This stream will focus on State, Federal and International initiatives to address mental health needs. Planning and initiatives of the COAG task force will be explored by the keynote speakers.

Primary interventions: This stream will focus on research validation of early intervention strategies and treatments for drug induced psychosis, trauma and depression.

Promoting recovery: This stream will focus on research validated treatments designed to facilitate recovery particularly in the areas of depression and trauma.

Preventing Suicide: This stream will explore initiatives and best practice in suicide prevention.

The conference P4 theme will be explored within these parameters by both individual conference papers and keynote presenters.

The 8th International Mental Health Conference on the Gold Coast will describe the range of preventive approaches used in the field of mental health and critically review their effectiveness. The meeting will emphasise how clinicians can incorporate these approaches and techniques into everyday clinical practice.

This will be achieved through conference workshops and keynote presentations.

This is a “must be there” meeting. We extend a warm invitation to attend the conference and look forward to seeing you.

This conference is open to:

- Non-government organisations
- Public health services
- Private health services
- Private practitioners
- Nurses
- Psychologists
- General Practitioners
